Standard-Aligned Onsite and Virtual Field Trips!

Protecting our Challenge Island students, staff, schools, families and communities is our highest priority during every Challenge Island onsite field trip. Learn more about our protective measures on the other side of this flyer.

High Energy - Cross-Curricular - Hands-On - Project-Based-Learning - 21st Century Skills

“One of the many things that makes Challenge Island stand out from the competition is what it lacks: You’ll find no screens or digital devices in a Challenge Island field trip, after-school class, camp or family night. Instead, kids use imagination, teamwork and problem-solving skills to come up with creative solutions to challenges using only a treasure chest full of low-tech supplies.”

Adventure without Ever
Leaving School Grounds!

In-School Field Trips

WWW.CHALLENGE-ISLAND.COM

Protecting our Challenge Island students, staff, schools, families and communities is our highest priority during every Challenge Island field trip. Our franchise owners are carefully following the guidance and directives from their state and local governments and their local health departments. Additionally, Challenge Island is reinforcing company-wide safety protocols based on CDC-recommended preventative measures, which are described in detail below:

Covid-19 Safety Measures for Onsite STEAM Field Trips

- ⚙️ We will run our onsite field trips in individual classrooms for each individual class - no large gatherings or mixed group assemblies necessary.
- ⚙️ We will cover work areas with disposable, protective table coverings and sanitize throughout using CDC approved guidelines.
- ⚙️ Materials distributed to children for use in their challenges will be brand new or thoroughly disinfected prior to use in adherence with CDC cleaning guidelines.
- ⚙️ Challenge Island teachers and staff have received resources, policies and procedures to help them protect themselves and the children and locations they work with.
- ⚙️ Challenge Island teachers and staff will be provided with protective face coverings to use in keeping with state, local or individual venue regulations and standards.
- ⚙️ Challenge Island teachers and staff will wash their hands immediately upon entering your building and will ensure they and the children follow all hand-washing requirements in place at your individual location.
- ⚙️ Challenge Island teachers will be required to do a personal health screen, using CDC guidelines, prior to entering your location.

Covid-19 Safety Measures for Virtual STEAM Field Trips

- ⚙️ Should your comfort level or state regulations prevent us from doing an in-person onsite field trip, we can perform a **Virtual Field** trip for the children at your location or for children at home.
- ⚙️ A bag of safe, new and thoroughly disinfected materials will be dropped off at your location prior to the field trip, along with directions on how to facilitate the distribution of materials on your end.
- ⚙️ We will teach the entire class live via zoom at the date and time of your event. We can accommodate multiple classes simultaneously or one at a time depending which is preferable.
- ⚙️ **We have had great success with our virtual field trip model and are confident that your students will have a meaningful and memorable experience!**
